

COVID-19 DELAYS WOUND CARE AND AMPUTATIONS INCREASE

Chronic wounds left untreated can lead to severe complications. During the pandemic, studies have shown an **increase in amputations** due to untreated non-healing wounds.

WOUND CARE MATTERS®.

Wound Care is Essential to amputation prevention.

Our Wound Care Center® has the specialized expertise to heal wounds faster.

Know if you are at risk

People living with health conditions that compromise their ability to heal, often have 3 or 4 coexisting health conditions that also affect their immunity and healing.

Ask about a **Telehealth** visit to see if this is an option for you.

We'll provide you with virtual access to a wound care provider.

Get back to living and don't let your wound go untreated. Call us today!
