

# Healogics®

## A standardized, evidence-based model that improves outcomes, efficiency, and hospital performance

Wound care experts aligning people, processes, and technology to deliver consistent, high-quality care through a nationwide network of Wound Care Centers®.

The Healogics® Patient Care Process is a proven, standardized approach to wound care delivery. Led by specialty-trained physicians and supported by dedicated Clinical Nurse Managers and clinical teams, the process integrates best practices, clinical protocols, and continuous quality-improvement tools. Together, these elements improve healing outcomes while increasing operational efficiency for hospital partners.

### WHY IT MATTERS

#### PATIENT

- Shorter wait times and quicker access to specialty wound care
- Improved healing outcomes and treatment completion
- Coordinated care guided by a dedicated clinical nurse navigator

#### HOSPITAL

- Higher quality and patient satisfaction through consistent care
- Stronger inpatient-to-outpatient transitions that reduce delays and leakage
- Improved compliance, survey readiness, and reporting

#### CENTER MANAGEMENT

- Standardized operations and data-driven performance management
- Defined roles and responsibilities
- Integrated quality-improvement tools for outcomes and Compliance

### VALUE ACROSS THE CARE TEAM

#### PHYSICIAN

- Coordinated team support for orders, diagnostics, and authorizations
- Streamlined clinic flow and standardized documentation
- Clinical insights that support care planning

#### CLINICAL STAFF

- Clear roles and responsibilities reinforced by competency programs
- Streamlined workflows, documentation, and proactive care reviews x
- Continuous education and quality routines that strengthen consistency and engagement
- Reduced Average Days to Admit
- Fewer cancellations
- Improved patient satisfaction and productivity
